qListView

Quick Start Guide for QuickApps qListView Updated March 2020

Introduction

This document is helpful for SharePoint Administrators, Tenant Administrators and **QuickApps qListView** users as it enables them to quickly start working with the app.

QuickApps qListView is a SharePoint add-in. This add-in allows you to:

- Quickly aggregate SharePoint list data from one or more lists or document libraries.
- Use point-and-click configuration instead of using custom code to customize SharePoint solutions up to 80 percent faster.
- Meet your most complex business requirements, from interface enhancements to complete solutions, without need for custom development training or experience.

System Requirements

To install QuickApps qListView, you must meet the following minimum system requirements:

Table 1. Minimum System Requirements

| Feature	Requirement
Rights and permissions	SharePoint Tenant Administrator rights on the SharePoint Site for installation. Site Admin Rights for configuration of app Read Rights for viewing data and basic operation
SharePoint Version	SharePoint Online
Browser	Edge, Latest version of Chrome, Firefox, and Safari, Internet Explorer 11

Deploying QuickApps App

Follow these steps to deploy the QuickApps qListView app to an organization's App Catalog.

1. To buy an app from the SharePoint Store refer to:
   https://support.office.com/en-us/article/Buy-an-app-from-the-SharePoint-Store-dd98e50e-d3db-4ecb-9bb7-82b189822d43
2. To add an app to a site refer to:

https://support.office.com/en-us/article/Add-an-app-to-a-site-ef9c0dbd-7fe1-4715-a1b0-fe3bc81317cb?ui=en-US&rs=en-US&ad=US
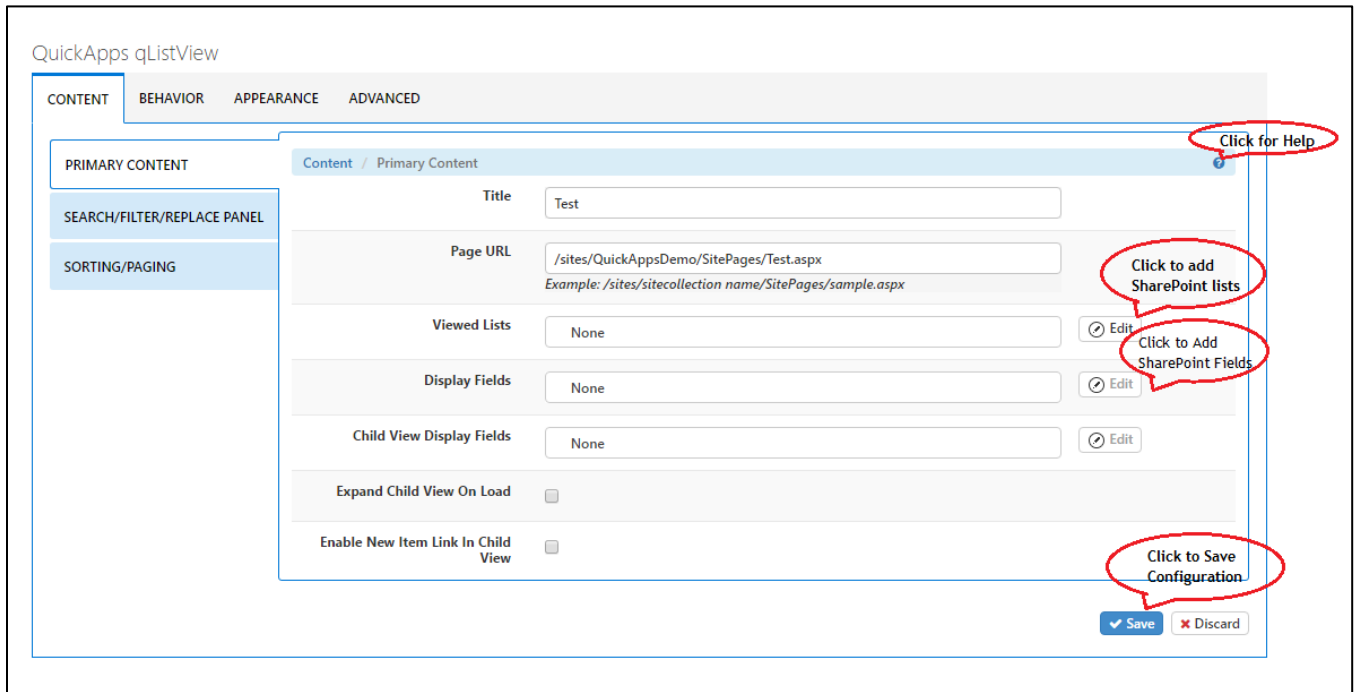

3. To add an App Part to a page refer to:
https://support.office.com/en-us/article/Add-an-App-Part-to-a-page-6f06c0b7-44b8-4c69-b4ad-85197eee8d78

4. To add the **QuickApps qListView** app part on a SharePoint page, follow these steps:
   - Create a page in the site where you want to add the QuickApps qListView app.
   - Edit the page and click the **+** button on the page.
   - Next, select the **qListView** ap to add the app on page.

   - Now save the page. **QuickApps qListView** app will be added to the page. You will be shown a screen below.

- If you have, the Site Admin rights then click the **Build** button in the app to open 'QuickApps qListView' in Configuration Mode.
- From the **Content > Primary Content** section, enter **Title**.

- Click the **Edit** button next to **Viewed List** to select one or more SharePoint lists.
- Click the **Edit** button next to **Display Fields** to select list fields.
- For **help** on any section click the Help icon from the top-right corner.
- Click the **Save** button to save the changes.
- QuickApps qListView will be rendered as per configuration.

- For updating configuration, click the **Menu** icon and then the **ezEdit** gear icon .
- For help click the **Help** icon from the menu.
